## EXPERIENCE

### ValueLabs Solutions, Hyderabad — *Software developer*

MAY 2017 - PRESENT

Responsible for uploading data into Elasticsearch, creating APIs to talk with UI (developed in ember JS) and write unit test cases for CI/CD.

Collaborated with other teams for responsiveness, usability, accessibility, SEO, performance optimization and maintenance of the sites.

### Cognizant Technology Solutions, Chennai — *Software developer*

JANUARY 2015 - MAY 2017

Developed hybrid mobile app in Angular JS. Coordinate with backend team to implement highly scalable mobile and web application.

## EDUCATION

### Rajasthan Technical University, Kota — *B.tech*

August 2010 - MAY 2014

Graduated in Electronics and Communication stream with 75%

## SOME TECH FACT

**Love at first sight:** Node.js, some time in 2011 Ryan Dahl writing 5 lines of code and building a web server

**Am I MEAN:** No, never worked on MongoDB

**I can code a backend in:** Node.js.

**Deployment:** AWS

**CI:** Travis

**Development model:** Test Driven Development

**Scrum:** Yes.

**Some popular libraries I have worked with:** JQuery, Express, Ember, Qunit, lodash...etc. I forgot few

**Some buzzwords:** refactoring, debugging, unit tests, regular expressions, modular, json, putty

## SKILLS

Ember JS, Angular JS

Javascript (ES5/ES6)

NodeJS

SASS

HTML, CSS

GIT

## PROJECTS
